Scenario:

Someone is looking for a healthy but filling meal after a long day of classes at a restaurant that is not too far away from their dorm

Tasks:

1. Look at menu by restaurant
2. Search for a craving
3. Make sure they have enough money or swipes to pay for it

Feedback #1:

- Improvements:
    - The interface for the menu for a restaurant could be aesthetically improved
    - There is no interface shown for the balance or settings pages
- Positives
    - Scrolling list is very intuitive
    - Everything is easy to access

Feedback #2

- Improvements:
    - The search bar has no filters which would greatly help it
    - The menu is not very helpful
- Positives
    - The menu does a good job of displaying everything
    - The use of buttons leads to an easy to navigate interface
